**People: Artecology
CoCreate**

CO-CREATE

Artecology CoCreate brings people together through creativity and eco-engineering to tackle real environmental challenges. Our hands-on workshops empower communities to restore biodiversity, design habitat-friendly structures, and reimagine how human spaces can work with nature - not against it.

Key Benefits:

- Community impact: Engage schools, businesses, and local groups in meaningful action and longterm legacy and stewardship.
- Creative learning: Hands-on workshops that blend art, science, and sustainability.
- Tailored solutions: Scalable projects to boost urban biodiversity and meet outreach goals.
- Policy alignment: Supports local and national sustainability and biodiversity objectives.
- Skills for the future: Builds lasting eco-engineering knowledge and community ownership.
- Evidence-backed benefits for people and wildlife (research with Uni of Plymouth).

Already underway across Portsmouth and Sussex Bay with City Arts
